

ICPE2007 Competition!

SEVEN WONDERS OF PHYSICS AND TECHNOLOGY

Voting Form

We are seeking to establish a list of **seven physics-related technological wonders of the world** — discoveries or inventions that have truly changed the way we live and the way we view our earth and the universe. Below is a list of 21 possible items, compiled with the help of members of the ICPE.

STEP 1. Choose **seven** items which you consider most suitable for being called a wonder of physics and technology, and tick the boxes next to the 7 items you chose. (*To simplify the job of counting votes, please tick exactly 7.*)

STEP 2. Hand in the completed voting paper to the Conference information desk, before the end of the second day of the conference (Tuesday, 13 November).

- Aeroplanes
- Astronomical observatories
- Data visualization
- Electrical generators
- Heat engines
- Hubble space telescope
- Lasers
- Medical and industrial imaging
- Microscopes
- Nanotechnology
- Optical fibre technology
- Particle accelerators
- Remote sensing devices
- Satellite communications
- Space travel
- Spectroscopes
- Superconductors
- Telescopes
- Transistors
- Wireless communication
- World Wide Web
